

Semantic Feature Analysis: Allows students to see relationships among content-specific vocabulary words, terms, concepts and phrases. Directions: Place the features and/or traits on the left-hand column, and the words or terms across the top. Check off, or describe, which of the words or phrases contain the features or traits. See the example below.

SFA for Science	Climate System	Word/phrase/co ncept	Word/phrase/co ncept	Word/phrase/co ncept	Word/phrase/co ncept	Word/phrase/co ncept
Freshwater	Adverse effects: global warming
