

Four Square Vocabulary

- Place the vocabulary word in the upper left box.
- Then describe the word to students.
- Have students generate examples and non-examples and place those in the upper and lower right-hand box.
- Finally, have students generate and write a definition of the concept in the lower left box.

<u>Vocabulary word</u>	<u>Examples</u>
<u>Definition</u>	<u>Non-examples</u>

Word Pairs Grid

This grid provides students the opportunity to see and discuss relationships between and among vocabulary words.

Relation	Same	Opposite	Go together	No Relation
desert-nomad			X	
nomad-wanderer	X			
nomad-settler		X		

Vocabulary Connections

Math definitions are usually related to English definitions.

Word	General Definition	Math Definition
Rational Square Root	Based on or agreeable to reason	A terminating or repeating number
Irrational Square Root	Not controlled or governed by reason	A number that continues without repeating
